## Band Bio

Kyle Luna and the Moon Dogs started the simple way - a few sailors met while serving in the Navy, shared some beers, and started making music. What began as late nights and rough ideas turned into something real once the songs started landing and the rooms started listening. There's no overthinking it - it's not rocket science, it's music. Honest songs, played loud, with a Southern grit built for bar rooms and after-dark stages.

## Music (Originals)

- Deep End (studio)
- Disease (studio)
- Running From Yesterday (studio)
